

# Freedom Residential

## What makes Freedom Residential different from other builders?

**Freedom** Residential homes are quality built homes, our trades people are local trades people and our building inspection team make sure that our quality stays to the highest standard.

When it comes to building a house with Freedom Residential you can rest easy when it comes to financing, because our home and land packages come complete with all floor coverings, air conditioning, paving, driveway, fencing, landscaping and more included in the price. Most banks and finance companies now ask for quotes on all these items when applying for a construction loan.

Our Build time is in most cases 24 weeks from council approval so getting in to your new home is quick and easy. With many of our house and land packages on offer council approval has already been sought and in some cases construction already started so build times are even faster than you might expect.

Freedom Residential homes are finished off with quality fixtures and fittings and their designs are individual and unique in the market place. For house plans please visit our website.

## Complete 4 Bedroom House & Land Packages \$269,000
